HOUSE BILL 1106

---

State of Washington                      60th Legislature                      2007 Regular Session

By Representatives Campbell, Chase, Hankins, Morrell, Appleton, Hudgins, McDermott and Wallace

Read first time 01/10/2007. Referred to Committee on Health Care & Wellness.

1            AN ACT Relating to the reporting of infections acquired in health  
2 care facilities; reenacting and amending RCW 70.41.200; adding a new  
3 section to chapter 43.70 RCW; adding a new section to chapter 42.56  
4 RCW; and creating a new section.

5 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

6            NEW SECTION.    **Sec. 1.** The legislature finds that each year health  
7 care-associated infections affect two million Americans. These  
8 infections result in the unnecessary death of ninety thousand patients  
9 and costs the health care system 4.5 billion dollars. Hospitals should  
10 be implementing evidence-based measures to reduce hospital-acquired  
11 infections. The legislature further finds the public should have  
12 access to data on outcome measures regarding hospital-acquired  
13 infections. Data reporting should be consistent with national hospital  
14 reporting standards.

15            NEW SECTION.    **Sec. 2.** A new section is added to chapter 43.70 RCW  
16 to read as follows:

17            (1) The definitions in this subsection apply throughout this  
18 section unless the context clearly requires otherwise:

1 (a) "Health care-associated infection" means a localized or  
2 systemic condition that results from adverse reaction to the presence  
3 of an infectious agent or its toxins and that was not present or  
4 incubating at the time of admission to the hospital.

5 (b) "Hospital" means a health care facility licensed under chapter  
6 70.41 RCW, including hospital-owned ambulatory surgical centers or  
7 outpatient surgical centers.

8 (2) The department shall:

9 (a) Adopt guidelines and rules for identifying, tracking,  
10 reporting, and releasing information related to outcome measures as  
11 related to health care-associated infections acquired in hospitals. In  
12 adopting these guidelines and rules related to health care-associated  
13 infections, the department shall consider the recommendations of the  
14 advisory committee established in (c) of this subsection as well as the  
15 recommendations, definitions, and methodologies, of the United States  
16 centers for disease control and prevention, the centers for health care  
17 research and quality, the centers for medicare and medicaid services,  
18 the joint commission on accreditation of health care organizations, the  
19 national quality forum, the institute for health care improvement, or  
20 other organizations with recognized expertise in infection control or  
21 quality improvement. The guidelines and rules shall establish criteria  
22 for excluding data from reporting where a data set is too small or  
23 possesses other characteristics that make it otherwise unrepresentative  
24 of a hospital's particular ability to achieve a specific outcome  
25 measure. The guidelines and rules shall consider outcome measures, for  
26 an entire hospital or specified units, in the following categories:

27 (i) Surgical site infections for selected procedures;

28 (ii) Surgical antimicrobial prophylaxis;

29 (iii) Outcome measures on ventilator-associated pneumonia;

30 (iv) Central line-associated, laboratory-confirmed bloodstream  
31 infections in the intensive care unit; and

32 (v) Other categories for which there are established,  
33 evidence-based measures and the department determines are necessary to  
34 protect public health and safety as provided in subsection (3) of this  
35 section;

36 (b) Publish an annual report on the department's web site that  
37 compares the hospital-acquired infection outcomes described in (a)(i)  
38 of this subsection at each individual hospital in the state.

1 Comparisons among hospitals shall be adjusted to consider patient mix  
2 and other relevant risk factors and control for provider peer groups,  
3 when appropriate. The annual report shall disclose data in a format so  
4 that no health information about any individual patient is released.  
5 The report shall not include data where the guidelines have determined  
6 that a data set is too small or possesses other characteristics that  
7 make it otherwise unrepresentative of a hospital's particular ability  
8 to achieve a specific outcome measure. The department may respond to  
9 requests for data and other information, at the requestor's expense,  
10 for special studies and analysis consistent with requirements for  
11 confidentiality of patient records and quality improvement information;

12 (c) Establish an advisory committee to make recommendations to the  
13 department in the development of guidelines and rules for the  
14 collection, reporting, and release of information related to health  
15 care-associated infections. The advisory committee shall consist of  
16 infection control professionals and epidemiologists. In developing its  
17 recommendations, the department shall consider the definitions,  
18 methodologies, and practices of the United States centers for disease  
19 control, centers for medicare and medicaid services, joint commission  
20 for the accreditation of health care organizations, and the institute  
21 for health care improvement related to health care-associated  
22 infections. The advisory committee shall meet as often as necessary to  
23 complete its duties, but not less than three times per year; and

24 (d) Report to the legislature in November 2009 regarding the  
25 activities of United States centers for disease control, centers for  
26 medicare and medicaid services, joint commission for the accreditation  
27 of health care organizations, and the institute for health care  
28 improvement related to reporting health care-associated infections.

29 (3) As guidelines are developed for preventing health  
30 care-associated infections and tracking outcomes and performance  
31 regarding health care-associated infections, the department shall  
32 include any procedures or categories of infections, including  
33 clostridium difficile, in the infection guidelines and rules developed  
34 pursuant to subsection (2)(a) of this section if the department  
35 determines that the guidelines are evidence-based, have been  
36 demonstrated to reduce health care-associated infections, and are  
37 feasible for hospitals to track. The department may consider  
38 guidelines from organizations with recognized expertise in infection

1 control or quality improvement including the United States centers for  
2 disease control and prevention, the centers for medicare and medicaid  
3 services, the centers for health care research and quality, the joint  
4 commission on accreditation of health care organizations, the national  
5 quality forum, and the institute of health care improvement.

6 (4) Each hospital shall:

7 (a) Collect information regarding health care-associated infection  
8 outcome measures for the categories identified in subsections (2) and  
9 (3) of this section; and

10 (b) Prepare a report every three months and submit the reports to  
11 the department. The collection and reporting of information shall be  
12 performed in accordance with the guidelines and rules of the  
13 department.

14 (5) The department shall adopt rules as necessary to carry out its  
15 responsibilities under this section.

16 (6) Neither the reports submitted by hospitals to the department  
17 under this section, nor any of the data contained in them, are subject  
18 to discovery by subpoena or admissible as evidence in a civil  
19 proceeding.

20 **Sec. 3.** RCW 70.41.200 and 2005 c 291 s 3 and 2005 c 33 s 7 are  
21 each reenacted and amended to read as follows:

22 (1) Every hospital shall maintain a coordinated quality improvement  
23 program for the improvement of the quality of health care services  
24 rendered to patients and the identification and prevention of medical  
25 malpractice. The program shall include at least the following:

26 (a) The establishment of a quality improvement committee with the  
27 responsibility to review the services rendered in the hospital, both  
28 retrospectively and prospectively, in order to improve the quality of  
29 medical care of patients and to prevent medical malpractice. The  
30 committee shall oversee and coordinate the quality improvement and  
31 medical malpractice prevention program and shall ensure that  
32 information gathered pursuant to the program is used to review and to  
33 revise hospital policies and procedures;

34 (b) A medical staff privileges sanction procedure through which  
35 credentials, physical and mental capacity, and competence in delivering  
36 health care services are periodically reviewed as part of an evaluation  
37 of staff privileges;

1 (c) The periodic review of the credentials, physical and mental  
2 capacity, and competence in delivering health care services of all  
3 persons who are employed or associated with the hospital;

4 (d) A procedure for the prompt resolution of grievances by patients  
5 or their representatives related to accidents, injuries, treatment, and  
6 other events that may result in claims of medical malpractice;

7 (e) The maintenance and continuous collection of information  
8 concerning the hospital's experience with negative health care outcomes  
9 and incidents injurious to patients including health care-associated  
10 infections, patient grievances, professional liability premiums,  
11 settlements, awards, costs incurred by the hospital for patient injury  
12 prevention, and safety improvement activities;

13 (f) The maintenance of relevant and appropriate information  
14 gathered pursuant to (a) through (e) of this subsection concerning  
15 individual physicians within the physician's personnel or credential  
16 file maintained by the hospital;

17 (g) Education programs dealing with quality improvement, patient  
18 safety, medication errors, injury prevention, infection control, staff  
19 responsibility to report professional misconduct, the legal aspects of  
20 patient care, improved communication with patients, and causes of  
21 malpractice claims for staff personnel engaged in patient care  
22 activities; and

23 (h) Policies to ensure compliance with the reporting requirements  
24 of this section.

25 (2) Any person who, in substantial good faith, provides information  
26 to further the purposes of the quality improvement and medical  
27 malpractice prevention program or who, in substantial good faith,  
28 participates on the quality improvement committee shall not be subject  
29 to an action for civil damages or other relief as a result of such  
30 activity. Any person or entity participating in a coordinated quality  
31 improvement program that, in substantial good faith, shares information  
32 or documents with one or more other programs, committees, or boards  
33 under subsection (8) of this section is not subject to an action for  
34 civil damages or other relief as a result of the activity. For the  
35 purposes of this section, sharing information is presumed to be in  
36 substantial good faith. However, the presumption may be rebutted upon  
37 a showing of clear, cogent, and convincing evidence that the  
38 information shared was knowingly false or deliberately misleading.

1           (3) Information and documents, including complaints and incident  
2 reports, created specifically for, and collected and maintained by, a  
3 quality improvement committee are not subject to review or disclosure,  
4 except as provided in this section, or discovery or introduction into  
5 evidence in any civil action, and no person who was in attendance at a  
6 meeting of such committee or who participated in the creation,  
7 collection, or maintenance of information or documents specifically for  
8 the committee shall be permitted or required to testify in any civil  
9 action as to the content of such proceedings or the documents and  
10 information prepared specifically for the committee. This subsection  
11 does not preclude: (a) In any civil action, the discovery of the  
12 identity of persons involved in the medical care that is the basis of  
13 the civil action whose involvement was independent of any quality  
14 improvement activity; (b) in any civil action, the testimony of any  
15 person concerning the facts which form the basis for the institution of  
16 such proceedings of which the person had personal knowledge acquired  
17 independently of such proceedings; (c) in any civil action by a health  
18 care provider regarding the restriction or revocation of that  
19 individual's clinical or staff privileges, introduction into evidence  
20 information collected and maintained by quality improvement committees  
21 regarding such health care provider; (d) in any civil action,  
22 disclosure of the fact that staff privileges were terminated or  
23 restricted, including the specific restrictions imposed, if any and the  
24 reasons for the restrictions; or (e) in any civil action, discovery and  
25 introduction into evidence of the patient's medical records required by  
26 regulation of the department of health to be made regarding the care  
27 and treatment received.

28           (4) Each quality improvement committee shall, on at least a  
29 semiannual basis, report to the governing board of the hospital in  
30 which the committee is located. The report shall review the quality  
31 improvement activities conducted by the committee, and any actions  
32 taken as a result of those activities.

33           (5) The department of health shall adopt such rules as are deemed  
34 appropriate to effectuate the purposes of this section.

35           (6) The medical quality assurance commission or the board of  
36 osteopathic medicine and surgery, as appropriate, may review and audit  
37 the records of committee decisions in which a physician's privileges  
38 are terminated or restricted. Each hospital shall produce and make

1 accessible to the commission or board the appropriate records and  
2 otherwise facilitate the review and audit. Information so gained shall  
3 not be subject to the discovery process and confidentiality shall be  
4 respected as required by subsection (3) of this section. Failure of a  
5 hospital to comply with this subsection is punishable by a civil  
6 penalty not to exceed two hundred fifty dollars.

7 (7) The department, the joint commission on accreditation of health  
8 care organizations, and any other accrediting organization may review  
9 and audit the records of a quality improvement committee or peer review  
10 committee in connection with their inspection and review of hospitals.  
11 Information so obtained shall not be subject to the discovery process,  
12 and confidentiality shall be respected as required by subsection (3) of  
13 this section. Each hospital shall produce and make accessible to the  
14 department the appropriate records and otherwise facilitate the review  
15 and audit.

16 (8) A coordinated quality improvement program may share information  
17 and documents, including complaints and incident reports, created  
18 specifically for, and collected and maintained by, a quality  
19 improvement committee or a peer review committee under RCW 4.24.250  
20 with one or more other coordinated quality improvement programs  
21 maintained in accordance with this section or RCW 43.70.510, a quality  
22 assurance committee maintained in accordance with RCW 18.20.390 or  
23 74.42.640, or a peer review committee under RCW 4.24.250, for the  
24 improvement of the quality of health care services rendered to patients  
25 and the identification and prevention of medical malpractice. The  
26 privacy protections of chapter 70.02 RCW and the federal health  
27 insurance portability and accountability act of 1996 and its  
28 implementing regulations apply to the sharing of individually  
29 identifiable patient information held by a coordinated quality  
30 improvement program. Any rules necessary to implement this section  
31 shall meet the requirements of applicable federal and state privacy  
32 laws. Information and documents disclosed by one coordinated quality  
33 improvement program to another coordinated quality improvement program  
34 or a peer review committee under RCW 4.24.250 and any information and  
35 documents created or maintained as a result of the sharing of  
36 information and documents shall not be subject to the discovery process  
37 and confidentiality shall be respected as required by subsection (3) of

1 this section, RCW 18.20.390 (6) and (8), 74.42.640 (7) and (9), and  
2 4.24.250.

3 (9) A hospital that operates a nursing home as defined in RCW  
4 18.51.010 may conduct quality improvement activities for both the  
5 hospital and the nursing home through a quality improvement committee  
6 under this section, and such activities shall be subject to the  
7 provisions of subsections (2) through (8) of this section.

8 (10) Violation of this section shall not be considered negligence  
9 per se.

10 NEW SECTION. **Sec. 4.** A new section is added to chapter 42.56 RCW  
11 to read as follows:

12 Any information and reports exchanged between hospitals and the  
13 department of health under section 2 of this act are exempt from  
14 disclosure under this chapter.

--- END ---
